

Stadium Lighting

Bloomfield Hills Schools

Fridays Reimagined

Challenge

- The Athletic Director's attention has been drawn to multiple lamp outages, which have rendered the field unusable for night games and resulted in lost field rental opportunities.

Solution

- Replace all sixty-eight 1,500-watt HID fixtures with new 750-watt Keystone Sport LighterLED fixtures.
- Custom-aim all fixtures according to the provided lighting design.

Improvements/Benefits

- A fully functional and illuminated field for Bloomfield Hills Schools
- Reliable use for their athletic teams
- Supporting additional optional uses within the school system

"Voss Lighting recently completed the installation of new stadium lights at the North Hills Middle School outdoor football stadium, and the results are truly outstanding. The project unfolded seamlessly from start to finish, with Voss Lighting demonstrating professionalism and efficiency throughout the process. The new lights themselves are nothing short of amazing, providing brilliant and uniform illumination that dramatically enhances the field for both players and spectators. We are extremely pleased with the entire experience and the spectacular outcome."
